## Spider Supplies Access Solution for Glass Replacement in Seattle

Seattle – Spider, a division of SafeWorks, LLC, provided a complete suspended access and material lifting solution for glass repair work on a 10-story commercial office building in downtown Seattle.

After loyally working with Spider equipment for many years, All New Glass immediately turned to Spider for a solution. Spider provided two swingstages – one 50-ft and one 60-ft in length – each powered by SC1000 traction hoists and rigged with davits, gantries, and counterweighted outrigger beams. Spider also equipped two monorail systems with Beta Max, Inc.'s Leo VFD material hoists to

enable the glass panels to be transported both laterally and vertically.

Additionally, Spider rigged the equipment, provided on-site user training to enable the customer's crew to reposition the platforms throughout the project, and supervised the first several maneuvers.

“Any time we have a suspended scaffolding need, we look to Spider,” commented Hugh Snyder, Sealant Manager and Suspended Scaffolding Coordinator with All New Glass. “The monorail system they implemented for this project saved us time and increased our efficiency as we performed glass replacements covering a large area. As always, Spider solved our access challenges and took care of our special project needs.”

The project began in May and is expected to be completed this summer.

### About Spider:

Founded in 1947, Spider, a division of SafeWorks, created the powered suspended access business by introducing the well-known Spider basket. Since then, our product and service offering has expanded greatly to serve the needs of an ever-growing marketplace. Spider is the largest manufacturer and distributor of access and safety solutions in North America, serving more customers from more locations with a wider variety of products and services than any other company. From baskets, traction hoist and platform rental, to safety and training, to specialty-engineered products - Spider has a strong team of professionals, along with a national network of sales, service and support capabilities to provide you with the most reliable access solutions available.
