## Spider's Permanent Installation on Trump Tower, New York Nears Completion

Seattle, WA - Spider, a division of SafeWorks, LLC, is in the final stages of installing a permanent roof machine atop Trump Tower in New York City.

A jib arm roof machine replaced the previous swing stage system. The tie-down anchor layout and mullion guide layout of the original system were mirrored with the new roof machine. In addition to providing a safe means to access the building's exterior, Spider technical support was instrumental in reconstructing the building's rooftop details necessary to complete the project. Complete compliance with current standards and codes was also attained throughout this replacement process.

The Trump Corporation has recognized the quality and dedication of the Spider name, leading it to turn to Spider for numerous suspended access challenges on some of the country's most renowned buildings. In addition to the Trump Tower project, Spider completed the installation of a similar roof machine on Trump International Hotel and Tower, New York in 2001. Spider recently received the award of the contract to supply the complete façade maintenance system for the new Trump International Hotel and Tower, Chicago. This project will consist of three standard roof machines as well as a custom-designed system. Spider's reputation is continually strengthened by exceeding the expectations of corporate giants like Trump.

The roof machine is currently in place and operational, with final commissioning expected by September, 2005.

### About Spider:

Founded in 1946, Spider, a division of SafeWorks, LLC, created the powered suspended access business by introducing the well-known Spider basket. Since then, our product and service offering has expanded greatly to serve the needs of an ever-growing marketplace. Spider is the largest manufacturer and distributor of access and safety solutions in North America, serving more customers from more locations with a wider variety of products and services than any other company. From baskets, traction hoist and platform rental, to safety and training, to specialty engineered products - Spider has a strong team of professionals, along with a national network of sales, service and support capabilities to provide you with the most reliable access solutions available.
