## **Spider Awarded Façade Maintenance Contract for 301 Mission Street, San Francisco**

Seattle, WA - Spider, a division of SafeWorks, LLC, has been awarded the contract to provide a complete façade maintenance system for a new condominium located at 301 Mission Street in San Francisco.

Millennium Partners, owner of the mixed use facility, has selected Spider to supply and install a custom fixed-in-place, crane-style roof machine atop the 58-story tower. A davit and socket system equipped with a platform will be installed on the mid-rise tower. Together, these elements will compose a complete façade maintenance system.

Steve Patterson, Construction Manager with Millennium Partners, stated, "Millennium has worked with Spider on several previous projects. We value their proven track record and the dependability of their systems, and we are pleased to have them on board again."

Upon its completion, the 301 Mission building will be the fourth tallest in San Francisco. The project is expected to be completed in January, 2009.

### **About Spider:**

Founded in 1946, Spider, a division of SafeWorks, LLC, created the powered suspended access business by introducing the well-known Spider basket. Since then, our product and service offering has expanded greatly to serve the needs of an ever-growing marketplace. Spider is the largest manufacturer and distributor of access and safety solutions in North America, serving more customers from more locations with a wider variety of products and services than any other company. From baskets, traction hoist and platform rental, to safety and training, to specialty engineered products - Spider has a strong team of professionals, along with a national network of sales, service and support capabilities to provide you with the most reliable access solutions available.
