Spider Provides Access for Painting of St. Louis Mural

Seattle – Spider, a division of SafeWorks, LLC, recently provided the suspended scaffolding solution for the painting of a custom 1,200 square foot mural on the exterior façade of a radio station’s headquarters in St. Louis.

The talented muralist team from On the Wall Productions turned to Spider for a standard rental equipment solution to get them to the work. Spider provided two swing stages, one 35 feet in length and the other 20 feet. They were powered by SC1000 traction hoists and equipped with beam tie-downs and an outrigger beam support stand. Spider’s St. Louis team rigged all of the equipment and provided on-site basic user training to enable the muralists to safely and efficiently operate the equipment.

Additionally, Spider provided the fall protection solution, including harnesses, lanyards, rope grabs, lifelines, and termination plates.

"I used Spider Staging on my first mural in the 1970s, and it was a breath of fresh air to once again be working with their pros in St. Louis on this challenging outdoor mural project," commented Robert Fishbone with On the Wall Productions. "The Spider team helped us plan well to maximize our time and costs, provided exceptional safety and stability, and gave us the same attention that they would to a million dollar client. Also, the suspended staging was easy to use and did not obstruct the views of our work with crossbars and shadows, as built-up scaffolding typically would. I highly recommend Spider to anyone considering a project where suspended access is required."

To view Spider’s equipment in action on this exciting project that colorfully captured the spirit of St. Louis, visit <https://www.youtube.com/watch?v=Dh1Yaue10zc>.

About Spider:

Founded in 1947, Spider, a division of SafeWorks, created the powered suspended access business by introducing the well-known Spider basket. Since then, our product and service offering has expanded greatly to serve the needs of an ever-growing marketplace. Spider is the largest manufacturer and distributor of access and safety solutions in North America, serving more customers from more locations with a wider variety of products and services than any other company. From baskets, traction hoist and platform rental, to safety and training, to specialty-engineered products - Spider has a strong team of professionals, along with a national network of sales, service and support capabilities to provide you with the most reliable access solutions available.
